Synovex ONE Feedlot Extended Release Implant is a growth promoting implant for increased rate of gain for up to 200 days in steers and heifers in confinement for slaughter. Each Synovex ONE Feedlot implant contains 200 mg of trenbolone acetate and 28 mg of estradiol benzoate with a porous polymer film coating that extends the pay-out period of the final formulation up to 200 days. Each Synovex ONE Feedlot implant consists of eight pellets. Administer one implant to each steer or heifer by subcutaneous implantation in the middle one third of the ear, as directed. No withdrawal period is required when used as directed. Designed to be used exclusively with the Synovex SX10 Gun.

USDA Beef Grades

Amerikietiška jautienos vertinimo sistema, kuri tampa pasaulio standartu.

Paremtas dviem kriterijais – marmuringumu ir amžiumi.

How The USDA Grades Your Steak!

Highest Quality!
ABUNDANT MARBLING

**Less Than
2% of Steaks
Are Graded
USDA Prime!**

Great Quality!
MODERATE MARBLING

Good Quality!
SLIGHT MARBLING

Marbling is the most prized feature in steaks. It is characterized by thin streaks of fat between muscle tissue. When cooked, the fat melts. This gives the meat unparalleled tenderness and a rich, buttery flavor.

Certified Angus Beef

It was 1978. Getting a great steak at home or even at a restaurant was hit or miss. The *Certified Angus Beef*[®] founders said, “You know what? We can do better. We can lay down a set of uncompromising standards for taste and then find the best Angus ranchers to help us.”

USDA ir ANGUS

Šiandien USDA sertifikuoja 86 jautienos prekės ženklus ir programas.

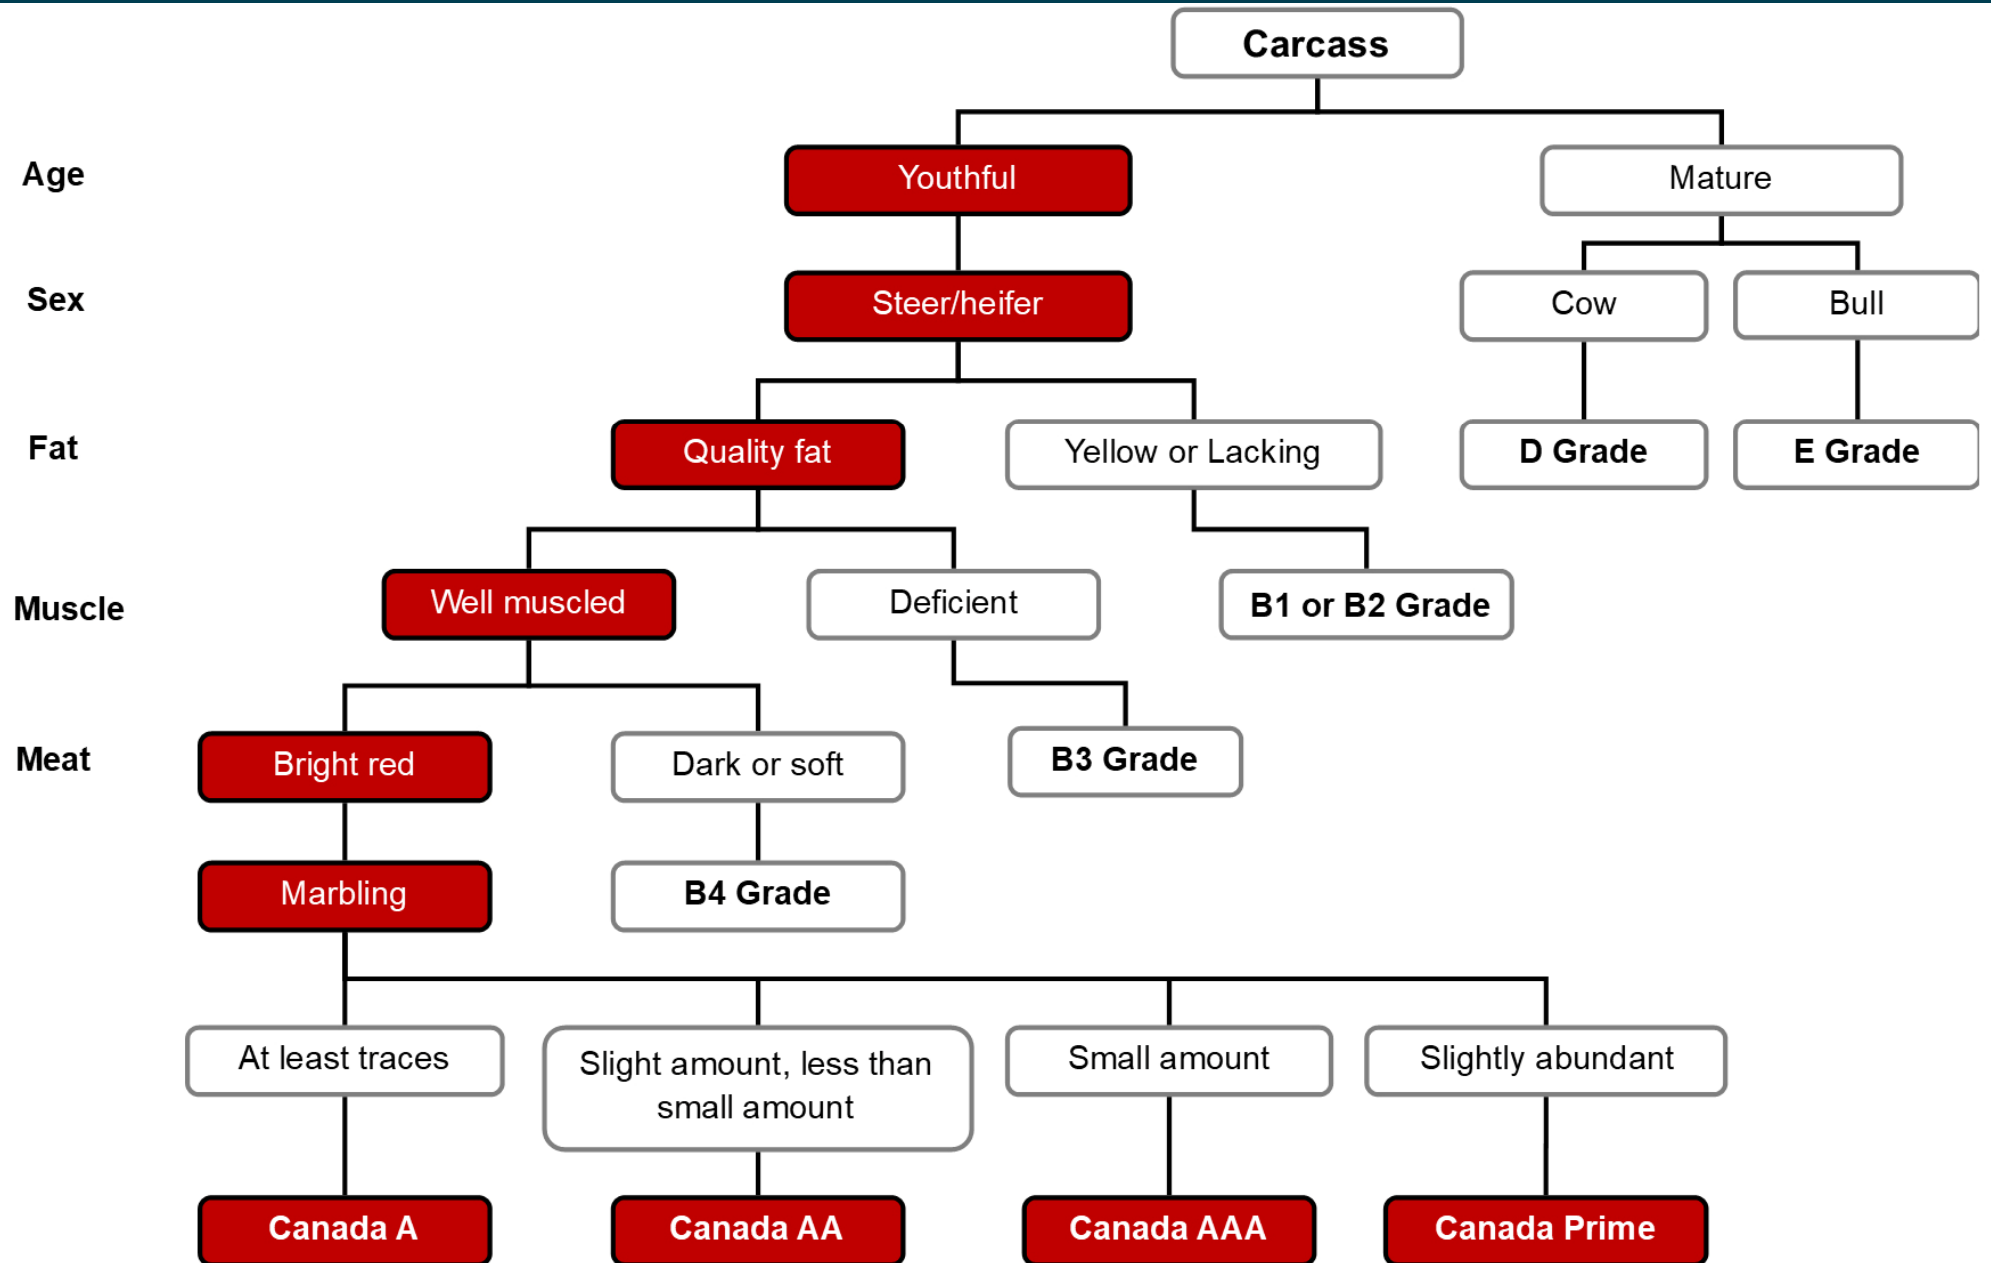

63 iš jų pavadinime turi žodį ANGUS.

CAB rinkos dalis USDA programuose išlieka didesnė negu 60%.

Angus is the magic word for beef marketing, and with that Angus label, you will pay more for the beef.

Miratorg

МИРАТОРГ
Signature

Beef Miratorg Signature

Miratorg Beef Signature is the best marbled Black Angus beef that has gone through additional 7 selection stages. Specific quality criteria as well as automatic and manual control create a truly faultless meat. It always has outstanding taste and flavor.

Miratorg

МИРАТОРГ MATURED BEEF

МЯСО КОРОВ BLACK ANGUS
— СУХОЕ ВЫЗРЕВАНИЕ —

MATURED BEEF

Matured beef is a unique product that has little alternatives in the world. It's the highest quality meat from Black Angus cows that have been cared for with kindness and all due attention their whole life.

Miratorg

Cows that are older than 3-4 years were previously considered as main supply for pet food but now the world has changed its view and learned to enjoy the chewy structure of matured beef steaks, its intense flavor and outstanding taste. Due to grass feeding and free range steaks from matured cows have lower marble grade but creamy fat makes the beef juicy and aromatic.

Carcase conformation	Average	Higher
Daily feed intake	Average	Higher
Concentrates in ration	Lower	Higher
Length of finishing period	Shorter	Longer

Kodėl Britai nevalgo Angus bulių?

Buliukas (iki 16mėn) ar Kastratas?

Angus bulius virš 16mėn? Kodėl?

Kontinentinės veislės bulius iki 16mėn / 24mėn

Didesnis pelningumas?

Geros kokybės jautiena.

Žinomumas, pastovumas ir vartotojo pasitikėjimas

Aukšta pardavimo kaina.

The logo features the word "ANGUS" in a bold, red, sans-serif font. The text is centered within a yellow shield-shaped background. This shield is framed by a thick red border that has a slight 3D effect, with the top edge being slightly wider than the bottom. The entire logo is set against a solid dark teal background.
